NMSU Reverse Engineering

Lecture 0 - Safety, Setup, and Vision

Joshua Reynolds Spring 2023

Reverse Engineering

Taking something apart to figure out how it works or is made

In software this can be used to:

- Steal technology/IP (e.g. patent infringement)
- Avoid DRM (think 'cracked', pirated software or VLC)
- 3. Make compatible products (like how LibreOffice can open .docx files)
- 4. Figure out what malicious programs do, and how to stop them
- 5. Develop software exploits

Reverse Engineering

Taking something apart to figure out how it works or is made

In software this can be used to:

- 1. Steal technology/IP (e.g. patent infringement)
- 2. Avoid DRM (think 'cracked', pirated software or VLC)
- 3. Make compatible products (like how LibreOffice can open .docx files)
- 4. Figure out what malicious programs do, and how to stop them
- **5.** Develop software exploits

We will study #4 in this course.

Careers in Reverse Engineering

Senior Research Engineer (Remote)
Minimum Salary: \$102,900

R&D Cybersecurity Vulnerability Research/Reverse Engineering Salary Range: 100-150K

Malware Reverse Engineer (Remote)
Salary Range: 100-150K (Glassdoor)

Malware Analysis Lab Safety & How class will work

Setup Github

Setup *nix OS

Setup Hypervisor

Download malware samples

Setup IDE if wanted

Remove Networking

Take Snapshot

Document the process for Lab 0

Take roll!
